### Brain O Brain programs:

Independent to their current age and ability, in just three months child will exhibit improvement in:

- Confidence
- Concentration
- Creativity
- Self-esteem
- Responsibility
- Empathy
- Mental Arithmetic
- Spelling
- Memory
- Retention
- Problem solving (analytical skills)
- Communication Skills

*Holistic approach to help child reach  
their full intellectual potential.*

### What families & teachers say...

While Jasmine (Age 9) is good at Math, she was lacking focus and careless in reviewing her work. Brain O Brain interests me most in helping her with focus and concentration.

Susan Matson, Parent & Director of Curriculum at ELS Language Centers.

My daughter Rhea (Age 7) always look forward for her next class at Brain O Brain. Now she is excited to start her next level. Since she started attending Brain O Brain, I have observed noticeable increase in her concentration, confidence, reading skills and of course Mathematical skills.

Divya Chadha, Iselin, NJ

It is so satisfying to interact with the children in class and to see them progress not just in spelling and mind math, but also in expressing their ideas. I have seen numerous children getting benefitted from the program in last two years of USA operations.

Master Trainer USA, Rajni

*Fun Filled Skill Development Program  
focused on Whole Brain Development  
(All Abilities, ages 5 to 14)*
